

Supplement E — Paired Cross Register

paired_event_manifest.csv

10 rows x 10 columns.

Columns: pair_id, event_id, season, event_name, highlight_source, fullrace_source, n_highlight_sentences, n_fullrace_sentences, match_type, notes

paired_category_prevalence.csv

2040 rows x 11 columns.

Columns: pair_id, event_id, threshold, category_id, category_name, register, n_category, n_total, n_assigned, p_all, p_assigned

paired_domain_prevalence.csv

24 rows x 9 columns.

Columns: threshold, domain, metric, n_events, mean_delta, median_delta, sd, n_positive, n_negative

threshold	domain	metric	n_events	mean_delta	median_delta	sd	n_positive	n_negative

matched_length_null_summary.csv

80 rows x 17 columns.

Columns: event_id, domain, metric, H_r, F_r, observed_effect, null_mean, null_sd, null_p2.5, null_p50, null_p97.5, p_one_sided_depletion, p_one_sided_enrichment, p_two_sided, z_vs_null, outside_central_95, below_null_p2.5

compositional_strategy_summary.csv

12 rows x 16 columns.

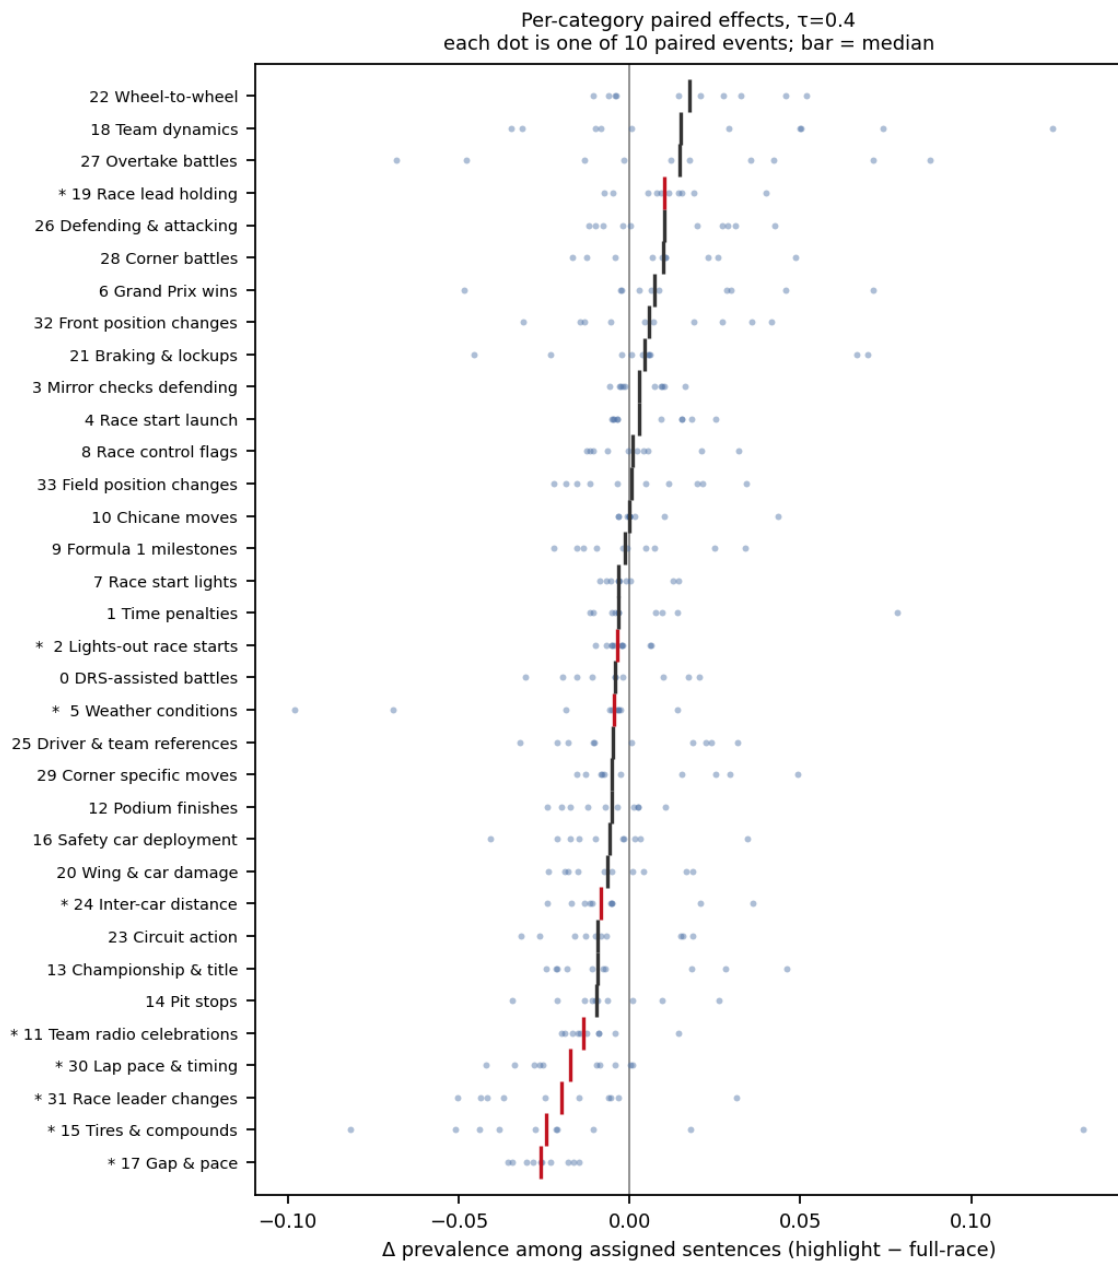

Columns: metric, column, median, mean, sd, q1, q3, iqr, min, max, n_negative, n_positive, sign_test_p, loo_sign_stable, loo_median_min, loo_median_max

paired_leave_one_out.csv

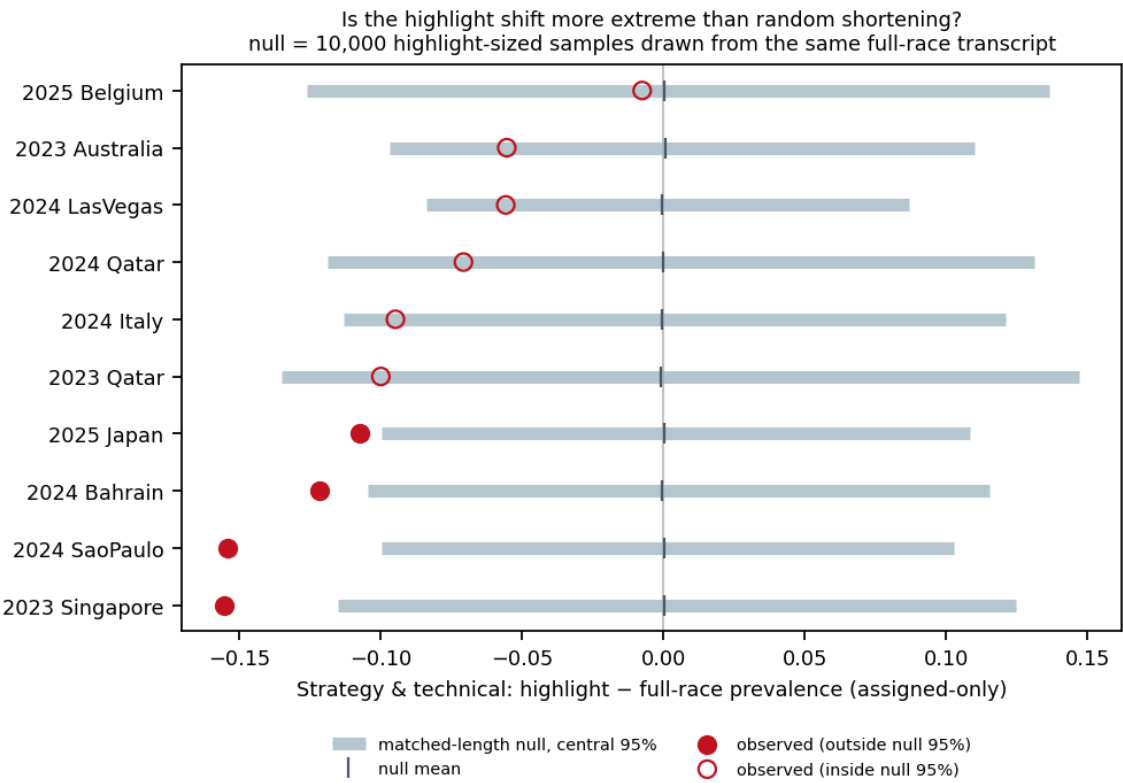

680 rows x 7 columns.

Columns: category_id, category_name, omitted_event, metric, n_events_used, median_delta, sign

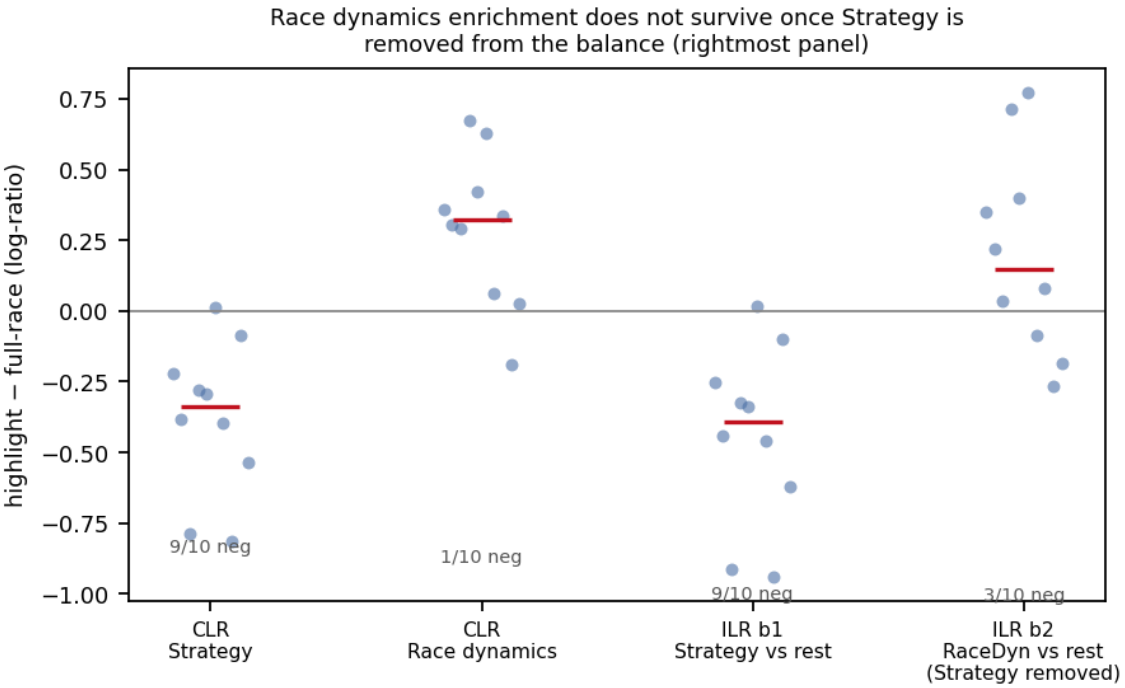

Figures

Per-category paired effects; each dot is one of ten events.

Observed event-level contrast against the matched-length null.

Race dynamics does not survive once Strategy is partitioned out.
